## SUMMARY

Enthusiastic Computer Science and Engineering student with a strong interest in programming and emerging technologies. Currently pursuing second year at Sathyabama Institute of Science and Technology. Quick learner with analytical thinking and teamwork abilities, seeking opportunities to apply academic knowledge in real-world projects and internships.

## SKILLS

|                       |                                                      |
|-----------------------|------------------------------------------------------|
| Programming Languages | Java, Python, JavaScript                             |
| Web Technologies      | HTML, CSS, Responsive Web Design                     |
| Design & UI/UX        | Figma, Canva, User Interface Design                  |
| Core Skills           | Problem Solving, Responsive Design, Basic Algorithms |

## EDUCATION

|             |                                                                                                        |                   |
|-------------|--------------------------------------------------------------------------------------------------------|-------------------|
| 2024 - 2028 | Bachelor of Computer Science and Engineering at <b>Sathyabama Institute of Science and Technology.</b> | (CGPA: 7.52/10.0) |
| 2024        | Class 12th Tamilnadu state Board                                                                       | (64%)             |
| 2022        | Class 10th Tamilnadu state Board                                                                       | (72%)             |

## PROJECTS

### Portfolio Website

Designed and developed a personal portfolio website to showcase projects and skills. Implemented responsive layout using HTML, CSS, and JavaScript with modern UI/UX principles.

### Web Calculator

Developed a functional calculator application using HTML, CSS, and JavaScript. Implemented arithmetic operations with interactive UI and real-time input handling.

### Speed Detection System

Developed a speed detection system to monitor vehicle speed and detect over-speeding conditions using programming logic and data processing concepts.
